Aclara

Aclara Technologies is a world-class supplier of smart infrastructure solutions (SIS) to water, gas, and electric utilities globally. Over 500 utilities in nine countries rely on proven Aclara solutions to connect with their customers.

SIS magnifies the benefits of networks that perform automated metering reading by incorporating a range of sensors, communications, and analytic technologies that let utilities monitor their distribution networks, optimize operations, respond to issues quickly, and preempt problems.

**Alliance Laundry Systems**

Alliance Laundry Systems, LLC headquartered in Ripon, WI is the largest manufacturer of commercial laundry equipment. Our family of brands offers solutions to a worldwide customer base through the delivery of premium quality laundry products and services. Our corporate focus of putting the customer first drives our commercial quality product development strategy, marketing programs, and technical support.

Whether the buyer is a large-scale hotel looking for an on-premises laundry, a laundromat owner, or a family in need of a washer and dryer for their residence, we’re dedicated to providing the most efficient, high quality solution.

Alliance Laundry Systems manufactures products under the well-known brand names of Speed Queen®, UniMac®, Primus®, Huebsch®, and IPSO®. Our brands are supported by an extensive network of distributors and route operators throughout the world.

**www.alliancelaundry.com**
Altair Engineering

Altair’s corporate culture thrives on seeking out business and technology firsts to radically change the way organizations design products and make decisions. We are focused on the development and broad application of simulation technology to synthesize and optimize designs, processes and decisions for our clients’ improved business performance.

Founded in 1985, Altair is headquartered in Troy Michigan with regional operations throughout 22 countries and a staff of more than 2,000 innovative employees. There is an entrepreneurial spirit that flows and is encouraged throughout our global workforce to develop and gather technology that is relevant to engineering and business.

www.altair.com

Altec HiLine

Altec is a leading provider of products and services to the electric utility, telecommunications, tree care, lights and signs, and contractor markets. We deliver products and services in more than 100 countries throughout the world.

www.altec.com

American Axle & Manufacturing

AAM is a leading, global Tier-One automotive supplier of driveline and drivetrain systems and related components for light trucks, SUVs, passenger cars, crossover vehicles and commercial vehicles with a regionally cost competitive and operationally flexible global manufacturing, engineering and sourcing footprint. Through highly-engineered, advanced technology products, processes and systems and industry leading operating performance, the AAM team provides a competitive advantage to our customers.

www.aam.com

American Engineering Testing

AET provides geotechnical, environmental, materials and forensics consulting and testing services to public and private sector clients in a broad spectrum of industries. We have built our reputation on experience, quality, and fulfilling client requirements in a cost effective and timely manner. Many of our principals, engineers, scientists and certified technicians have decades of practical experience in their areas of specialization. Our extraordinary accumulation of site data and construction history in the Upper Midwest has been a valuable asset for many professionals.

www.amengtest.com
American Transmission Co.  
American Transmission Co. was founded in 2001, as the first multi-state, transmission-only utility in the United States. Unlike most other utilities, we have a single focus: transmission. Our transmission system allows energy producers to transport electric power from where it’s generated to where it’s needed. It’s similar to the interstate highway system with high-voltage electricity traveling on the transmission system wires like vehicles on the highway. ATC provides electric transmission service in an area from the Upper Peninsula of Michigan, throughout the eastern half of Wisconsin and into portions of Illinois. Our more than 9,500 miles of high-voltage transmission lines and 530 substations provide communities with access to local and regional energy sources.  
www.atcllc.com/careers

Ames Construction, Inc.  
Ames Construction has grown into a full-service, heavy civil and industrial general contractor that serves customers throughout North America. Ames remains a family-owned enterprise, deeply rooted in a strong work ethic that values business relationships built on honesty, performance and mutual trust. We understand that our past success is a direct result of performing to the best of our ability, every day on every project.  
www.amesconstruction.com

Amtrak  
The National Railroad Passenger Corporation, Amtrak, is a corporation striving to deliver a high quality, safe, on-time rail passenger service that exceeds customer expectations. Amtrak employs more than 20,000 diverse, energetic professionals in a variety of career fields throughout the United States. We seek qualified, dedicated professionals with demonstrated work experience and/or relevant skills to join our team.  
www.amtrak.com

Amway  
We are a $10+ billion pioneer in the direct-selling industry, offering millions of people an opportunity to become entrepreneurs in more than 100 countries and territories. Established in 1959, with the belief that all people should have a chance to reach their greatest potential, Amway now employs more than 20,000 people worldwide. We offer 450+ products that are primarily focused on nutrition, beauty and home, led by our brands NUTRILITE, ARTISTRY and eSpring. Based in Ada, Michigan, Amway is not only a center of health, skincare and home product innovation and top-selling, global brands. We are a company committed to providing employees with challenging career opportunities, a comprehensive total rewards package, profit sharing, tuition assistance, product discounts and an award-winning wellness program with on-site fitness facilities in Ada, Michigan and Buena Park, California. Here, you have the opportunity to add value and be valued—to deliver your highest value professionally, while building relationships with exceptional people who genuinely value you.

Helping to keep the lights on,
businesses running
and communities strong®

ATC owns, builds, maintains and operates the electric transmission system in portions of the Upper Midwest. We have offices in Pewaukee, Madison, De Pere and Kingsford. American Transmission Co. is an equal opportunity employer functioning under an affirmative action plan. We encourage women, minorities, veterans and individuals with a disability to apply.

Ames Construction

Is your degree in Civil Engineering, Civil Engineering Technology,
Construction Management, Surveying or Surveying Engineering?

Ames Construction is currently seeking applicants for the positions of Project Engineer, Field Engineer and Surveyor. Founded in 1962, Ames is a full-service heavy civil and industrial general contractor, self-performing throughout North America in: ENERGY: power plants, refineries and renewables; MINING: development, infrastructure, leach pads, tailings dams and reclamation; TRANSPORTATION: railroads, bridges, highways and airports; WATER AND WASTEWATER: dams, reservoirs, pipelines and treatment; and COMMERCIAL: retail, residential, stadiums and golf courses.

Apply online at AmesConstruction.com

INSTILLING TRUE CONFIDENCE. DELIVERING SUCCESS.
Aqua-Aerobic Systems, Inc.  
Aqua-Aerobic Systems, Inc. is a private company servicing its customers around the world with performance-proven, quality products and systems that are adaptable to the changing demands of the water and wastewater treatment industry. Our markets range from small to medium sized municipalities to large metro areas around the world, treating both domestic and industrial waste streams. We pride ourselves on establishing life-long relationships by fully understanding our customers’ needs while working collaboratively to provide the best treatment solution at the lowest cost of ownership over the life of the plant.

www.aqua-aerobic.com

Applied Pavement Technology, Inc.  
Applied Pavement Technology, Inc. (APTech) is a full-service pavement engineering consulting firm that provides effective solutions for the design, evaluation, maintenance, and rehabilitation of roadway and airport pavements. Since its founding in 1994, APTech has worked with clients at the State, Federal, and local level in the United States and abroad, and we are a recognized leader in our industry. APTech helps its clients identify cost-effective strategies that reduce the overall life cycle cost of preserving the pavement network while incorporating the latest pavement-related designs and technologies into organizational practice.

www.appliedpavement.com

Appleton Marine, Inc.  
Appleton Marine is a leading manufacturer of custom cranes, winches, and specialty equipment for worldwide applications. Appleton Marine provides comprehensive product development and manufacturing services to leading companies in the marine, defense, oil and gas, and mining industries. At Appleton, you will work with knowledgeable employees serving a global environment providing the highest quality equipment for some of the most demanding applications. We provide quality machinery and services to such customers as General Dynamics, Lockheed, Northrop Grumman, Fluor, Shell, Chevron, Exxon Mobil, the US Coast Guard and the U.S. Navy. Together we will transform our customer’s cutting edge ideas into market leading products through product design, design development, testing, assembly, and installation in some of the most demanding environments. At Appleton, we take pride in our employees and our high quality products and services.

www.appletonmarine.com

Applus RTD  
Applus RTD is a leading provider of non-destructive testing, inspection and certification to the capital-intensive, high-risk energy, utility and infrastructure industries in every region of the world.

www.ApplusRTD.us
Participate in the Class Tribute Program

The Annual Fund will be with you every step of the way. From scholarships, to buildings, to lab equipment, the Annual Fund is a big part of your Michigan Tech experience. You will have your first chance to give back to the Michigan Tech Annual Fund by participating in the Class Tribute Program during commencement.

This program offers you the opportunity to publicly recognize and honor someone who has played a special role in your life and in your Michigan Tech education. Your tribute will appear in a special section of the Commencement program. Spring graduates will also have their tributes (along with a photo if they choose) displayed on the ice arena’s video scoreboard.

A tribute is a great way to say thanks to
- mom and dad,
- grandparents,
- a spouse,
- a favorite professor or advisor,
- a good friend or roommate,
- a campus student group, or
- someone else who has had an impact on your time at Tech.

Adrienne
Thank you Mom and Dad for everything that you have done to get me where I am! Love Adrienne <3

Luke Bowman
Thanks to my supportive family, friends, Irene, and the Gierkes. Couldn't have done it without you!

All proceeds from the program are used to support scholarships for incoming students. For more info visit mtu.edu/giving/partners/current/tribute/

**Autoliv ASP, Inc.**

Autoliv ASP, Inc. is an equal opportunity employer providing a competitive salary with a rich benefits package. Autoliv, Inc., the worldwide leader in automotive safety systems, develops and manufactures automotive safety systems for all major automotive manufacturers in the world. Autoliv is the supplier of automotive safety systems with a range of product offerings, including modules and components for passenger and driver-side airbags, side-impact airbag protection systems, seatbelts, steering wheels, safety electronics, whiplash protection systems and child seats, as well as night vision systems, radar and other active safety systems. Autoliv Inc. is a Fortune 500 company. Together with our joint ventures, Autoliv has more than 80 facilities with more than 60,000 employees in 28 countries. In addition, Autoliv has ten technical centers in nine countries around the world, with 20 test tracks, more than any other automotive safety supplier. Sales in 2014 amounted to US $9.2 billion. For more information about Autoliv, please visit our company website at www.autoliv.com/careers.

**Auto-Owners Insurance**

For over 60 years, Autoliv has focused on one very important issue: saving lives. Our innovative products save 30,000 lives every year and prevent 10 times as many injuries.

We are first and foremost a safety technology company. In the world of automotive occupant safety, we were the first to introduce the two- and three-point seat belt system and airbags for front and side impacts. We were also the first to launch pyrotechnic belt pretensioners and pedestrian protection systems.

Meeting real-world customer needs with a wide range of products and systems has helped us become the clear market leader in automotive safety.

**Axalta Coating Systems**

If you want to work with forward thinking people in a fast moving, innovative environment, Axalta offers you the best market-leading career opportunities. We are a unique company. While our name is new, we are backed by a 145-year legacy of providing some of he most advanced coating technologies to customers all over the world. We rank number one or two in all of the major business segments we serve. Our longstanding commitment to progressive research is setting new standards and pointing the way to beautiful and sustainable coating solutions for tomorrow. At our Mt. Clemens Michigan facility, we have opportunities in R&D, technical support, and production control. Please stop by to start a conversation.

**Black River Systems Co., Inc.**

Black River Systems Company is an established research-oriented engineering firm headquartered in Utica, NY. Our staff excels at systems and software engineering applied to all phases of advanced system development. Most of our efforts are related to the design, development, and analysis of sensor systems and their functional subsystems. Our systems engineers define requirements, perform functional analysis, design advanced algorithms, and analyze field test data. Our software and computer engineers develop real-time software applications, embed them in high performance, parallel architectures, and integrate software and systems. We develop tools and utilities to support our work: systems simulations and models, graphic visualizations, and network solutions. Our focus is applied engineering.

Black River is committed to advancing our employees’ quality of life on the job. We offer a competitive salary and an excellent benefits package. We are looking for an exceptional employee with strong technical skills and a personality suited to the small business environment.

Cone Drive, based in Traverse City, Michigan, is an industry leader in precision motion control and industrial power transmission solutions. Cone Drive has extensive experience in numerous industries; including solar, metals, mining, defense, oil & gas, food packaging & process, pulp & paper, plastics, entertainment and more. We are the world leader in double enveloping worm gear technology, which delivers solutions with the highest torque and shock load capacity in the smallest amount of space. Our products are renowned for their durability and precision.

At Consumers Energy, our customers are at the heart of everything we do. Our ability to deliver reliable electric and natural gas services begins with our commitment to reflecting the unique character and diverse perspectives of the 6.5 million people we serve across Michigan. As a major Midwest company with more than 7,000 employees, we’re powered by the Value of All: the idea that every individual matters, and that the best way to serve our community is to be an active part of it.

With sales of €33.3 billion in 2013, Continental is among the leading automotive suppliers worldwide and currently has approximately 178,000 employees in 49 countries. The Automotive Group with its three divisions Chassis & Safety (sales of approx. €7.3 billion in 2013, roughly 36,500 employees), Powertrain (sales of approx. €6.3 billion in 2013, roughly 32,400 employees) and Interior (sales of approx. €6.6 billion in 2013, 34,400 employees) sales of approximately €20 billion in 2013. As a partner to the automotive and commercial vehicle industry, it develops and produces innovative products and systems for a modern automotive future.

CONTROLTEC®, CT®, is a worldwide provider of telematics and analytics solutions currently serving the transportation industries in the light duty, heavy duty, agriculture, locomotive, and industrial sectors.

Curt G. Joa, Inc.

Since 1932, the Curt G. Joa name has stood for engineering excellence. Located in Sheboygan Falls, Wisconsin, USA, our engineers, technicians and assembly staff work together to create custom, state-of-the-art machines that have made Joa the world-wide standard in quality equipment.

From engineering and design through installation, we're a one-stop shop for complete web manufacturing solutions. We do not outsource key manufacturing and assembly operations. We design our machines to last, and we constantly work to improve our equipment and processes to manufacture new products. Our designs also allow us to incorporate advancements into existing machines, eliminating the huge costs for replacement equipment.

At Curt G. Joa, Inc., we form long-term strategic partnerships with our customers, meaning we continually work to meet their ever-changing requirements. And for over 80 years, we've been meeting those needs.

Daimler Trucks North America

Since 1942 Daimler Trucks North America LLC (DTNA) has profoundly altered the face of North American highways. DTNA and its affiliate, Detroit Diesel Corporation (DDC), constitute the largest and most diverse company in the North American commercial vehicle market. Our DTNA family includes the iconic heavy- and medium-duty vehicle brands Freightliner Trucks, Western Star Trucks, and Thomas Built Buses. We also manufacture Freightliner Custom Chassis, Axle Alliance axles and components, and Detroit® engines to ensure a quality product, through and through. Our state-of-the-art Detroit Diesel Remanufacturing (DDR) facilities breathe new life into salvaged engines and components, restoring them to their original condition and functionality and supporting our mission of environmental sustainability. Daimler Trucks North America offers challenging and rewarding careers at its locations across North America in diverse business and technical fields. If you crave international experience, DTNA’s parent company, Daimler AG, provides opportunities for overseas placements and travel.

Freeport-McMoRan

We’re a global leader in the production of natural resources that people around the world depend on every day. Our work drives progress, delivering essential resources for infrastructure, communications and technology. We provide the resources for growth around the world. From initial exploration through to the production and reclamation processes, we’re a key link in the sustainable technology and products that move us all toward a cleaner, healthier, more productive tomorrow. Find out more about what we do—and how we do it responsibly.

Freeport-McMoRan is a leading international natural resources company with headquarters in Phoenix, Arizona. We operate large, long-lived, geographically diverse assets on four continents, with significant proven and probable reserves of copper, gold, molybdenum, cobalt, oil and gas.

Whether you are a new graduate beginning your career or a student ready for the ultimate internship experience, Freeport-McMoRan has opportunities for you. Our intern and new graduate positions include a variety of majors and disciplines.

• ENGINEERING: Chemical, Civil, Electrical, Environmental, Geological, Mechanical, Metallurgical and Mining
• SCIENCE: Chemistry, Geology, Hydrogeology and Mineralogy
• SAFETY: Industrial Hygiene and Occupational Health
• BUSINESS: Accounting, Finance, Supply Chain, Human Resources and Information Technology

Freeport-McMoRan is an exciting place to work and offers a great beginning for your career. Attracting new talent with innovative ideas and a fresh perspective is a high priority for our experienced management team. We know that realizing our company’s tremendous potential will depend on the next generation of highly qualified employees.
Gallagher-Kaiser Corporation

Gallagher-Kaiser was established in 1952 and has corporate offices in Troy and Detroit, Michigan. Over the years, leading automotive manufacturers and suppliers around the world have come to rely on Gallagher-Kaiser to consistently deliver turn-key solutions to their toughest challenges. We offer a full breadth of services, including engineering services, iron and sheet metal work, mechanical piping, equipment installation, facility launch and management.

GE Johnson Construction Co.

Gil Johnson, a second generation builder, founded GE Johnson Construction Company in 1967 with a vision of a better way. He valued building client relationships as much as building great structures. A pioneer in the CM/GC delivery process, Gil instilled a culture of exceeding client expectations throughout the Rocky Mountain Region.

Today, Jim Johnson, President & CEO, continues this vision to provide innovative project services and to always deliver on our commitments. Our resume of over $7 billion in completed projects ranges from $10,000 to over $250 million, with more than 90% of our business coming from repeat clients. The company headquarters remain in Colorado Springs, though we have completed projects across the United States. To serve our clients with unparalleled service, we also have offices in Denver & Vail, CO, Oklahoma City, OK, and Jackson, WY.

HDR

We believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That coloring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward.

We specialize in engineering, architecture, environmental and construction services. While we are most well-known for adding beauty and structure to communities through high-performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts and artists.

www.johnsoncontrols.com

Johnson Controls is a Fortune 500 Diversified, multi-industrial, multinational conglomerate with 177,000 employees in more than 1,300 locations across six continents. It is listed as 67th in the Fortune 500 and 251st in Global 500.
Johnsonville Sausage, LLC

Kiewit is one of North America’s largest and most respected construction and engineering organizations. With its roots dating back to 1884, the employee-owned company operates through a network of offices and projects in the United States, Canada and Australia. Kiewit offers construction and engineering services in a variety of markets including transportation, water/wastewater, power, oil and gas, and chemical, building and mining. Kiewit had 2013 revenues of $11.8 billion and employs more than 33,000 staff and craft employees.

Johnsonville Sausage is the No. 1 national sausage brand featuring: brats, burgers, Italian sausage, smoked-cooked links, breakfast sausage in fully cooked and fresh varieties, meatballs and summer sausage. Johnsonville employs approximately 1,600 people, which the company refers to as “members.” Each member takes ownership of product quality to ensure the excellence and “Big Taste” of Johnsonville Sausage. Johnsonville is not only known for great tasting sausage products, but also their award-winning work environment. Johnsonville’s unique culture has been recognized in numerous publications including Harvard Business Review, FORTUNE, Inc. and The Wall Street Journal. The company was also recently certified by The Good Jobs for excelling in six areas of corporate culture: Career Development, Corporate Responsibility, Extreme Perks, Inclusion, Fun and Flex Time.

Founded in 1945 by the late Ralph F. and Alice Stayer, Johnsonville remains privately owned today.

We invite you to consider a career with the Naval Nuclear Laboratory (NNL) where you can experience continual challenge, work with some of this nation’s brightest and most dedicated engineers and scientists, and make a significant contribution to our country’s defense. Laboratory employees are involved in all facets of the Naval Nuclear Propulsion Program, from basic research and design, through support of the operating U.S. fleet of surface ships and submarines. This breadth of responsibility provides NNL employees with many paths to follow throughout their career. The future of the NNL is promising and will continue to offer tremendous opportunities for enthusiastic people who want challenge and the chance to make an impact on something important. Our continued success will depend upon hiring the right people. We encourage you to take the time to learn if a career with NNL is right for you.

www.NavalNuclearLab.com

Provide acquisition engineering, in-service engineering and technical support for SENSORS, ELECTRONICS, ELECTRONIC WARFARE and SPECIAL WARFARE WEAPONS. Apply component and system level product and industrial engineering to surface sensors, strategic systems, special warfare devices and electronic warfare/information operations systems. Execute other responsibilities as assigned by the Commander, Naval Surface Warfare Center.

Nucor Corporation

Nucor Corporation is a Fortune 150 company headquartered in Charlotte, North Carolina, United States. It is the second largest steel producer in the United States, and the largest of the “mini-mill” steelmakers (those using electric arc furnaces to melt scrap steel, as opposed to companies operating integrated steel works with blast furnaces). Nucor is North America’s largest recycler of any material, recycling one ton of steel every two seconds. The company’s total annual steel-making capacity roughly is 25 million tons. Nucor operates 23 scrap-based steel production mills within the US.

ThermoAnalytics has remained committed to mastering both the art and the science of thermal simulation, based specifically on transient analysis methodology. As opposed to most modeling software that simulates heat modeling in a steady-state, laboratory-like environment, transient analysis simulates the true complexity of the real-world environment and the performance of the manufactured components.

Tyco International

Tyco is the leader in the fire protection and security industry, we’ve been keeping homes and buildings safe for decades. But now we’re ready to move forward into a new era. We want our technology to analyze, to learn, to adapt. We want to find new ways to help customers solve the next generation of challenges they face.

Our focus is on turning data from sensors and systems into valuable insights and services that can solve those challenges and improve our customers’ operations and performance. With more than a billion sensors and devices already in place across the globe, we’re in a unique position to deliver that future. That’s a huge head start on making the Internet of Things work for customers. It’s no understatement to say that the possibilities are limitless—bounded only by our imagination and ability to understand what drives our customers. And that’s where you come in.

If you can help us to answer the big IoT questions and create ground-breaking systems that make lives safer and better, we can provide a massive platform for your ideas.

University of Detroit Mercy School of Law

At the University of Detroit Mercy School of Law learn hands-on from day one. At UDM, Law students will participate in a legal writing program that starts in the first year and continues through upper level courses.

On July 30, 2014, the U.S. Patent & Trademark Office (USPTO) granted certification to the University of Detroit Mercy School of Law’s Intellectual Property Clinic. UDM law students will draft and file patent applications for clients and gain experience answering Office Actions and communicating with patent examiners regarding the IP Clinic’s applications. The selection committee chose UDM’s Intellectual Property Clinic based on its solid IP curriculum, pro bono legal services to the public, and community networking and outreach efforts.

We are also committed the global perspective with our dual degree program with the University of Windsor and extensive international and comparative law courses.

Our location is in the heart of Detroit’s resurgent downtown core and provides great opportunities for our students. We offer full and part-time day classes along with part-time and extended evening classes.
